### Questions to Ask Before Buying That Thing You've Always Wanted

Even if you're generally comfortable with your finances, you may occasionally worry about how much you're spending, especially if you consistently have trouble saving for short- or long-term goals. Here

are a few questions to ask that might help you decide whether a purchase is really worth it.

#### Why do I want it?

Maybe you've worked hard and think you deserve to buy something you've always wanted. That may be true, but are you certain you're not being unduly influenced by other factors such as stress or boredom?

Take a moment to think about what's important to you. Comfort? Security? Safety? Status? Quality? Thriftiness? Does your purchase align with your values, or are you unconsciously allowing other people (advertisers, friends, family, neighbors, for example) to influence your spending?

#### How will buying this now affect me later?

When you're deciding whether to buy something, you usually focus on the features and benefits of what you're getting, but what are you potentially forgoing? When you factor this into your decision, what you're weighing is known as the opportunity cost. For example, let's say you're trying to decide whether to buy a new car. If you buy the car, will you have to give up this year's family vacation to Disney World? Considering the opportunity cost may help you evaluate both the direct and indirect costs of a purchase. Ask yourself how you will feel about your purchase later. Tomorrow? Next month? Next year?

#### Will this purchase affect your family?

Couples often fight about money because they have conflicting money values. Will your spouse or partner object to your purchasing

decision? And what about your children? Children learn from what they observe. Are you comfortable with the example you might be setting?

#### Do I really need it today?

Buying something can be instantly and tangibly gratifying. After all, which sounds more exciting: spending \$1,500 on the ultra-light laptop you've had your eye on or putting that money into a retirement account? Consistently prioritizing an immediate reward over a longer-term goal is one of the biggest obstacles to saving and investing for the future. The smaller purchases you make today could be getting in the way of accumulating what you'll need 10, 20, or 30 years down the road.

Be especially wary if you're buying something now because "it's such a good deal." Take time to find out whether that's really true. Shop around to see that you're getting the best price, and weigh alternatives. You may discover a lower-cost product that will meet your needs just as well. If you think before you spend money, you may be less likely to make impulse purchases and more certain that you're making appropriate financial choices.

#### Can I really afford it?

Whether you can afford something depends on both your income and your expenses. You should know how these two things measure up before making a purchase. Are you consistently charging purchases to your credit card and carrying that debt from month to month? If so, this may be a warning sign that you're overspending. Reexamining your budget and financial priorities may help you get your spending back on track.

## Ten Year-End Tax Tips for 2017

### **Deductions may be limited for those with high incomes**

*If your adjusted gross income (AGI) is more than \$261,500 (\$313,800 if married filing jointly, \$156,900 if married filing separately, \$287,650 if filing as head of household), your personal and dependent exemptions may be phased out, and your itemized deductions may be limited. If your 2017 AGI puts you in this range, consider any potential limitation on itemized deductions as you weigh any moves relating to timing deductions.*

### **IRA and retirement plan contributions**

*For 2017, you can contribute up to \$18,000 to a 401(k) plan (\$24,000 if you're age 50 or older) and up to \$5,500 to a traditional or Roth IRA (\$6,500 if you're age 50 or older). The window to make 2017 contributions to an employer plan generally closes at the end of the year, while you typically have until the due date of your federal income tax return (not including extensions) to make 2017 IRA contributions.*

Here are 10 things to consider as you weigh potential tax moves between now and the end of the year.

### **1. Set aside time to plan**

Effective planning requires that you have a good understanding of your current tax situation, as well as a reasonable estimate of how your circumstances might change next year. There's a real opportunity for tax savings if you'll be paying taxes at a lower rate in one year than in the other. However, the window for most tax-saving moves closes on December 31, so don't procrastinate.

### **2. Defer income to next year**

Consider opportunities to defer income to 2018, particularly if you think you may be in a lower tax bracket then. For example, you may be able to defer a year-end bonus or delay the collection of business debts, rents, and payments for services. Doing so may enable you to postpone payment of tax on the income until next year.

### **3. Accelerate deductions**

You might also look for opportunities to accelerate deductions into the current tax year. If you itemize deductions, making payments for deductible expenses such as medical expenses, qualifying interest, and state taxes before the end of the year, instead of paying them in early 2018, could make a difference on your 2017 return.

### **4. Factor in the AMT**

If you're subject to the alternative minimum tax (AMT), traditional year-end maneuvers such as deferring income and accelerating deductions can have a negative effect. Essentially a separate federal income tax system with its own rates and rules, the AMT effectively disallows a number of itemized deductions. For example, if you're subject to the AMT in 2017, prepaying 2018 state and local taxes probably won't help your 2017 tax situation, but could hurt your 2018 bottom line. Taking the time to determine whether you may be subject to the AMT before you make any year-end moves could help save you from making a costly mistake.

### **5. Bump up withholding to cover a tax shortfall**

If it looks as though you're going to owe federal income tax for the year, especially if you think you may be subject to an estimated tax penalty, consider asking your employer (via Form W-4) to increase your withholding for the remainder of the year to cover the shortfall. The biggest

advantage in doing so is that withholding is considered as having been paid evenly through the year instead of when the dollars are actually taken from your paycheck. This strategy can also be used to make up for low or missing quarterly estimated tax payments.

### **6. Maximize retirement savings**

Deductible contributions to a traditional IRA and pre-tax contributions to an employer-sponsored retirement plan such as a 401(k) can reduce your 2017 taxable income. If you haven't already contributed up to the maximum amount allowed, consider doing so by year-end.

### **7. Take any required distributions**

Once you reach age 70½, you generally must start taking required minimum distributions (RMDs) from traditional IRAs and employer-sponsored retirement plans (an exception may apply if you're still working for the employer sponsoring the plan). Take any distributions by the date required — the end of the year for most individuals. The penalty for failing to do so is substantial: 50% of any amount that you failed to distribute as required.

### **8. Weigh year-end investment moves**

You shouldn't let tax considerations drive your investment decisions. However, it's worth considering the tax implications of any year-end investment moves that you make. For example, if you have realized net capital gains from selling securities at a profit, you might avoid being taxed on some or all of those gains by selling losing positions. Any losses over and above the amount of your gains can be used to offset up to \$3,000 of ordinary income (\$1,500 if your filing status is married filing separately) or carried forward to reduce your taxes in future years.

### **9. Beware the net investment income tax**

Don't forget to account for the 3.8% net investment income tax. This additional tax may apply to some or all of your net investment income if your modified AGI exceeds \$200,000 (\$250,000 if married filing jointly, \$125,000 if married filing separately, \$200,000 if head of household).

### **10. Get help if you need it**

There's a lot to think about when it comes to tax planning. That's why it often makes sense to talk to a tax professional who is able to evaluate your situation and help you determine if any year-end moves make sense for you.

## It's Time for Baby Boomer RMDs!

*In 2016, the first wave of baby boomers turned 70½, and many more reach that milestone in 2017 and 2018. What's so special about 70½? That's the age when you must begin taking required minimum distributions (RMDs) from tax-deferred retirement accounts, including traditional IRAs, SIMPLE IRAs, SEP IRAs, SARSEPs, and 401(k), 403(b), and 457(b) plans.*

In 2016, the first wave of baby boomers turned 70½, and many more reach that milestone in 2017 and 2018. What's so special about 70½? That's the age when you must begin taking required minimum distributions (RMDs) from tax-deferred retirement accounts, including traditional IRAs, SIMPLE IRAs, SEP IRAs, SARSEPs, and 401(k), 403(b), and 457(b) plans. Original owners of Roth IRAs are not required to take RMDs.

If you're still employed (and not a 5% owner), you may be able to delay minimum distributions from your current employer's plan until after you retire, but you still must take RMDs from other tax-deferred accounts (except Roth IRAs). The RMD is the smallest amount you must withdraw each year, but you can always take more than the minimum amount.

Failure to take the appropriate RMD can trigger a 50% penalty on the amount that should have been withdrawn — one of the most severe penalties in the U.S. tax code.

### Distribution deadlines

Even though you must take an RMD for the tax year in which you turn 70½, you have a one-time opportunity to wait until April 1 (not April 15) of the following year to take your first distribution. For example:

- If your 70th birthday was in May 2017, you turned 70½ in November and must take an RMD for 2017 no later than April 1, 2018.
- You must take your 2018 distribution by December 31, 2018, your 2019 distribution by December 31, 2019, and so on.

### IRS tables

Annual RMDs are based on the account balances of all your traditional IRAs and employer plans as of December 31 of the previous year, your current age, and your life expectancy as defined in IRS tables.

Most people use the Uniform Lifetime Table (Table III). If your spouse is more than 10 years younger than you and the sole beneficiary of your IRA, you must use the Joint Life and Last Survivor Expectancy Table (Table II). Table I is for account beneficiaries, who have different RMD requirements than original account owners. To calculate your RMD, divide the value of each retirement account balance as of December 31 of the previous year by the distribution period in the IRS table.

### Aggregating accounts

If you own multiple IRAs (traditional, SEP, or SIMPLE), you must calculate your RMD separately for each IRA, but you can actually withdraw the required amount from any of your accounts. For example, if you own two traditional IRAs and the RMDs are \$5,000 and \$10,000, respectively, you can withdraw that \$15,000 from either (or both) of your accounts.

Similar rules apply if you participate in multiple 403(b) plans. You must calculate your RMD separately for each 403(b) account, but you can take the resulting amount (in whole or in part) from any of your 403(b) accounts. But RMDs from 401(k) and 457(b) accounts cannot be aggregated. They must be calculated for each individual plan and taken only from that plan.

Also keep in mind that RMDs for one type of account can never be taken from a different type of account. So, for example, a 401(k) required distribution cannot be taken from an IRA. In addition, RMDs from different account owners may never be aggregated, so one spouse's RMD cannot be taken from the other spouse's account, even if they file a joint tax return. Similarly, RMDs from an inherited retirement account may never be taken from accounts you personally own.

**Birthday Guide: This chart provides sample RMD deadlines for older baby boomers.**

Month & year of birth	Year you turn 70½	First RMD due	Second RMD due
Jan. 1946 to June 1946	2016	April 1, 2017	Dec. 31, 2017
July 1946 to June 1947	2017	April 1, 2018	Dec. 31, 2018
July 1947 to June 1948	2018	April 1, 2019	Dec. 31, 2019
July 1948 to June 1949	2019	April 1, 2020	Dec. 31, 2020
July 1949 to June 1950	2020	April 1, 2021	Dec. 31, 2021

## Is the Social Security Administration still mailing Social Security Statements?

Your Social Security Statement provides important information about your Social Security record and future benefits. For several years, the Social Security Administration (SSA) mailed these statements every five years to people starting at age 25, but due to budgetary concerns, the SSA has stopped mailing Social Security Statements to individuals under age 60.

Workers age 60 and over who aren't receiving Social Security benefits will still receive paper statements in the mail, unless they opt to sign up for online statements instead. If you're age 60 or older, you should receive your statement every year, about three months before your birthday. The SSA will mail statements upon request to individuals under age 60.

However, the quickest way to get a copy of your Social Security Statement is to sign up for a *my* Social Security account at the SSA website, [ssa.gov](http://ssa.gov). Once you've signed

up, you'll have immediate access to your statement, which you can view, download, or print. Statement information generally includes a projection of your retirement benefits at age 62, at full retirement age (66 to 67), and at age 70; projections of disability and survivor benefits; a detailed record of your earnings; and other information about the Social Security program.

The SSA has recently begun using a two-step identification method to help protect *my* Social Security accounts from unauthorized use and potential identity fraud. If you've never registered for an online account or haven't attempted to log in to yours since this change, you will be prompted to add either your cell phone or email address as a second identification method. Every time you enter your account username and password, you will then be prompted to request a unique security code via the identification method you've chosen, and you need to enter that code to complete the log-in process.
